NUMBER 1

Lin Yantian and **Yuan Hong**	1	Torsion of a finite length laminar composite circular cylinder debonded over a penny-shaped area
A. Neimitz and **Elias C. Aifantis**	9	On the role of the process zone in hydrogen assisted cracking—I. Threshold conditions
A. Neimitz and **Elias C. Aifantis**	19	On the role of the process zone in hydrogen assisted cracking—II. Kinetic conditions
Wang Tzu-Chiang	27	Elastic–plastic fields near crack tip growing step-by-step in a perfectly plastic solid
P. S. Theocaris	39	The independence of the T-criterion from the strength anisotropy of the materials
E. E. Gdoutos, M. A. Kattis and **C. G. Kourounis**	55	An infinite plate weakened by a curvilinear hole
G. A. Papadopoulos and **P. I. Poniridis**	65	Crack initiation from blunt notches under biaxial loading
K. S. Parihar and **Veena Prasad**	79	Plane strain problem of a Griffith crack in an initially stressed neo-Hookean elastic strip
Chiaki Ihara and **Tetsuya Misawa**	95	A stochastic model for fatigue crack propagation with random propagation resistance
R. K. Pandey, C. R. Pratap and **R. Chinadurai**	105	Significance of rotational factor r in CTOD determination and the effect of material and loading geometry on r
Nao-Aki Noda, Masa-Aki Tsubaki and **Hironobu Nisitani**	119	Stress concentration of a strip with V- or U-shaped notches under transverse bending
C. W. Springfield, Jr and **H. Y. Jung**	135	Investigation of stress concentration factor–stress intensity factor interaction for flaws in filleted rods
F. Delale	145	Critical fiber size for microcrack suppression in ceramic-fiber/ceramic-matrix composites
P. R. Heyliger	157	On conventional and quarter-point mixed elements in linear elastic fracture mechanics
		Letter to the Editor
Kim Wallin	173	Comments on "Statistical analysis of fracture toughness data" by D. J. Neville

NUMBER 2

W. Shaofu, Z. Xing and H. Qingzhi — 191 Functional variable displacement method in analysis of singularity near the corner point in a three dimensional cracked solid

W. Cheng and I. Finnie — 201 K_I Solutions for an edge-cracked strip

L.-W. Chen and Y. M. Chen — 209 Vibrations of hygrothermal elastic composite plates

R. Moskovic and P. L. Windle — 221 Suggested procedures for the analysis of multi-specimen fracture toughness test data

S. K. Cheong and C. S. Hong — 237 Analysis of cracks emanating from a circular hole in an orthotropic plate under mixed mode deformation

K. P. Herrmann and W. Meiners — 249 On a generalization of Irwin's formula concerning curvilinear interface cracks in brittle two-phase composite structures

P. S. Theocaris — 255 Blunting phenomena in cracked ductile plates under mixed mode conditions

G. A. Papadopoulos and P. I. Poniridis — 271 The influence of geometry of edge-blunt-notched plates on crack initiation

Y. Z. Chen — 289 Multiple crack problems for finite plate with arbitrary contour configuration

Y. Z. Itoh, T. Murakami and H. Kashiwaya — 297 Proportional extrapolation techniques for determining stress intensity factors

X. Shaobo, L. Guangxia and L. Changchun — 309 Application of indentation technique in determining fracture toughness of ceramics

E. G. Ladopoulos — 315 On the numerical evaluation of the general type of finite–part singular integrals and integral equations used in fracture mechanics

T. Hoshide, T. Ohara and T. Yamada — 339 Fatigue behavior of ceramic materials under variable stress amplitude

L. G. Luo, A. I. Quarrington and J. D. Embury	349	Effect of specimen geometry on ductile initiation CTODi using a direct method
M. A. Mahmoud	357	Growth patterns of surface fatigue cracks under cyclic bending—a quantitative analysis
	I	Software Survey Section

NUMBER 3

G. C. Salivar, J. N. Yang and B. J. Schwartz	371	A statistical model for the prediction of fatigue crack growth under a block type spectrum loading
Liu Yi and Li Xiao-Wei	381	A simple test method for determining J_{IC} of mild steel by means of single side-grooved precracked Charpy-type specimen
X. S. Zhang and Y. Zhang	385	A concentric penny-shaped crack off the middle plane of a finite orthotropic cylinder under torsional shear stress
P. S. Theocaris	395	The COD and SIF variations along the deformed crack front of an edge-cracked thick plate
T. S. Gross and D. A. Mendelsohn	405	On the effect of crack face contact and friction due to fracture surface roughness in edge cracks subjected to external shear
V. Tvergaard	421	3D-Analysis of localization failure in a ductile material containing two size-scales of spherical particles
L. Schovanec	437	A mode III crack problem in a bonded composite material
T. V. Hareesh and F. P. Chiang	451	Integrated experimental-finite element approach for studying elasto-plastic crack-tip fields
H. Sakamoto and S. Takezono	463	Fatigue crack propagation under step variation of stress frequency in orthotropic material
E. Smith	475	The stability of a long circumferential through-wall crack in a pipe subject to bending deformation
T. Nishioka and H. Yagami	481	Invariance of the path independent T^* integral in nonlinear dynamic fracture mechanics, with respect to the shape of a finite process zone
S. W. Ma	493	A central crack in a finite rectangular plate with constrained edges parallel to the crack under the opening mode
A. Shukla, R. K. Agarwal and H. Nigam	501	Dynamic fracture studies on 7075-T6 aluminum and 4340 steel using strain gages and photoelastic coatings

V. K. Srivastava	517	Fracture behaviour of Zirconia oxide filled unidirectional glass fibre reinforced plastic composites
S. Dhar	525	Influence of multiple overload on fatigue crack retardation in high strength low alloy structural steel
N. J. Marchand, R. M. Pelloux and B. Ilschner	535	A fracture mechanics criterion for thermal-mechanical fatigue crack growth of gas turbine materials
		Letter to the Editor
D. Munz	553	Comment on "Strength size effects and fracture mechanics: What does the physical evidence say?"
		Announcement

NUMBER 4

X. S. Zhang	557	General solutions of a concentric penny-shaped crack in a thick plate sandwiched between two different outer layers
T.-L. Sham	567	Weight functions for piecewise homogeneous isotropic notches in antiplane strain by finite element method
K. Hollmann and J. Bäcklund	577	Notch sensitivity of linearly softening materials exhibiting tensile fracture
B. N. Cox and W. L. Morris	591	Monte Carlo simulations of the growth of small fatigue cracks
Yu Shou-Wen and D. Gross	611	The singular field at a rigid flat inclusion in hardening materials under longitudinal shear
Y. Shindo and H. Tamura	617	Singular twisting moment in a cracked thin plate under an electric current flow and a magnetic field
K. T. Venkateswara Rao, W. Yu and R. O. Ritchie	623	On the behavior of small fatigue cracks in commercial aluminum–lithium alloys
C. Atkinson, J. M. Bastero and J. M. Martínez-Esnaola	637	Stress analysis in sharp angular notches using auxiliary fields
S. L. Lee and D. J. Unger	647	A decohesion model of hydrogen assisted cracking
Kang Yong Lee and Heung Soap Choi	661	Determination of thermal stress intensity factors for traction free cusp cracks under uniform heat flow

M. R. Straight, T. S. Sudarshan and J. H. Wilson — 673 Significance of defects in fatigue of Cu–Ni/steel welds

B. S. Majumdar, A. R. Rosenfield and W. H. Duckworth — 683 Analysis of R-curve behavior of non-phase-transforming ceramics

R. Bowman, S. D. Antolovich and R. C. Brown — 703 A demonstration of problems associated with crack closure measurement techniques

Letter to the Editor

K. Sobczyk — 713 Markov models for fatigue crack growth

Technical Note

R. Pippan — 715 The length and the shape of cracks under cyclic compression: the influence of notch geometry

NUMBER 5

R. Chandra, K. Guruprasad and K. Dwarakanath — 719 Energy release rates in patched cracked plates

S. C. Tan — 733 Mixed-mode fracture of notched composite laminates under uniaxial and multiaxial loading

S. Mall and N. K. Kochhar — 747 Characterization of debond growth mechanism in adhesively bonded composites under mode II static and fatigue loadings

J. W. Nicholson and S. R. Mettu — 759 Computation of dynamic stress intensity factors by the time domain boundary integral equation method—I. Analysis

S. R. Mettu and J. W. Nicholson — 769 Computation of dynamic stress intensity factors by the time domain boundary integral equation method—II. Examples

S. K. Bhambri, V. Singh and K. Rajanna — 783 Microstructure, stage II fatigue crack growth rates and dynamic fracture toughness—a correlation

A. M. Kumar, G. T. Hahn, C. A. Rubin and N. Xu — 793 A crack arrest toughness test for tough materials

W. Chang — 807 Applying similarity methods to fracture mechanics—measurement of fracture toughness K_{1c}, K_Q values by small-scale single specimen

M. Kumosa and D. Hull — 817 Finite element analysis of a circumferentially cracked cylindrical shell under uniform tensile loading

X. S. Zhang	827	The general solution of a finite orthotropic cylinder with a concentric penny-shaped crack under torsion
X. S. Zhang	837	An infinite sheet weakened by doubly periodic circular holes with two unequal radial cracks
X. S. Zhang	847	The general solution of an edge crack off the center line of a rectangular sheet for mode III
A. Halim, W. Dahl and K. E. Hagedorn	857	Measurements of stretched zone width (SZW)—a round robin program of European Group on Fracture
R. Pippan	867	The sensitivity to measure crack closure with strain gauges near the crack tip
T. Kobayashi, K. Matsunuma, H. Ikawa and K. Motoyoshi	873	Evaluation of static and dynamic fracture toughness in ceramics
G. A. Papadopoulos	887	Dynamic crack-bifurcation by the Det.-criterion
		Technical Note
N. I. Ioakimidis	895	Mangler-type principal value integrals in hyper-singular integral equations for crack problems in plane elasticity
	I	Software Survey Section

NUMBER 6

X. S. Zhang and Y. Zhang	899	An eccentric crack of mode III at the interface between two different media in a rectangular sheet
X. S. Zhang	909	An eccentric crack normal to two interfaces among three layers in a rectangular sheet under anti-plane shear
D. Z. Zhang and S. F. Zhu	917	Use of double clip gauge method to measure the plastic rotational factor r_p
Zhao-Bangji, Lang-Fuyuan and Wei-Qingtong	923	Determining K_I of a V-notch from the existing results of a linear crack
A. Toshimitsu Yokobori, Jr and T. Yokobori	931	The crack initiation and growth under high temperature creep, fatigue and creep-fatigue multiplication
S. D. Smith, J. J. Webster and T. H. Hyde	947	Finite element simulation of elastic-creep growth of a semicircular surface crack
Zheng Xiulin and L. Chao	959	On the expression of fatigue crack initiation life considering the factor of overloading effect

Y. Z. Itoh, T. Murakami and **H. Kashiwaya**	967	Approximate formulae for estimating the J-integral of a circumferentially cracked round bar under tension or torsion
Y. M. Tsai	977	Dynamic penny-shaped crack in a transversely isotropic material
Y.-S. Cheng and **Y. Huang**	985	Measurement of continuous damage parameter
Luo Gangming and **Z. Yongyuan**	993	Improvement of stress singular element for crack problems in three dimensional boundary element method
W. J. Bottega	1001	Debonding of a predeflected segment of layer from the wall of a contracting cavity
M. Nait Abdelaziz, R. Neviere and **G. Pluvinage**	1009	Experimental investigation of fracture surface energy of a solid propellant under different loading rates
Dai Yao and **Hwang Keh-Chih**	1027	Unsteady growth of mode III crack in elastic perfectly-plastic material
M. Sarfarazi	1035	An overview of the constitutive behavior of crystalline solids
